# THE SAFETY SOLUTION FOR YOUR DRIVERS AND YOUR FLEET

Dual-Vision XC4 increases a fleet's productivity and profitability by improving driver performance. Let Dual-Vision XC4 protect your bottom line by reducing fuel consumption, stopping dangerous driving habits before they lead to accidents, and lowering insurance premiums by reducing accident claims !

Prevent the Event **Increase Safety** **Lower Insurance Premiums** **Reduce Risky Driving Behavior** **Track Vehicles in Real-Time**

ABOUT ROSCOLIVE + GEOTAB INTEGRATION

The DVXC4 recorder connects via cellular service with RoscoLive, a cloud storage feature that works with Geotab to provide video of Exceptions detected by the GO7 device. DVXC4 automatically sends snapshots and/or video clips of critical incidents and important Exceptions, as pre-configured according to rules set up by the fleet administrator, for real-time viewing on MyGeotab. All Exception video clips are retained in RoscoLive Cloud Storage and are available for viewing and downloading any time. The RoscoLive+Geotab Add-In provides a great opportunity for video support of the powerful Geotab driver performance and incident recording features. DVXC4 continuously records as long as the vehicle is in operation, and has its own internal high-capacity memory, enabling the storage and retrieval of non-Exception videos for further analysis when required.
